

Educating Childhood Cancer Patients & Survivors

A Conference for Teachers & School Personnel

March 5, 2021 via Zoom | 9:30am - 4:00pm EST

About this Event

Childhood cancer can make school a challenge. Missed school days and cognitive late effects from treatment can make it difficult for our young patients and survivors to keep up with their peers.

The Educating Childhood Cancer Patients & Survivors conference aims to help teachers, school nurses and administrators learn about childhood cancer, common late effects and how to support patients, survivors and siblings in the classroom.

This virtual conference offers a certificate of completion that confers 5 Continuing Education Units (CEUs) for teachers and nurses upon completion of the course evaluation.* This conference is offered free of charge.

Conference Speakers

Michael Engel, MD, Ph.D

Division Chief, Pediatric Hematology & Oncology
University of Virginia Medical Center

Anne Mauck, CPNP, CPON, MSN, BSN, RN

Hematology & Oncology

Tune in on the day of the event for the opportunity to engage directly with the presenters and get your questions answered by experts in real time! After March 5, registration will remain open and recordings of the conference will be available to view until June 1. CEUs will be available upon completion of presentation evaluations.

*This continuing nursing education activity was approved by the Virginia Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. Awarding of CEUs is dependent on attendance at all six information sessions at the conference.
